Mary Meigs Atwater's Recipe Book CD
File Types on the CD

- Weaving Information File: .wif
- Fiberworks: .dtx
- Patternland: .pww, .psy, .pwd,
- WeaveIt: .wev, .jpg's are also used
- WeavePoint: .wpo
- Graphics: .tif, .bmp, jpg
- PatternMaker: .xsd (charts)
- Adobe Acrobat Reader: .pdf
- Microsoft Word: .doc and Microsoft Excel: .xls

- Software programs for Windows users:

Fiberworks Demo program: View Wif files and dtx files (used by permission)
Pattern Maker Viewer: View and print charted Designs

See www.weavenotes.net for more information about weaving software.

Mary Meigs Atwater's Recipe Book CD
Explore the Book

- Print the entire book at home or at a copy center.

Use yellow cardstock for the covers and black cerlox binding to duplicate original. Permission is given for you to print a copy of the book or pages from the book for your own use.

- Print a page from the book and open the folder

Look at the WIF files in your weaving software or use the Fiberworks demo.
Current links for weaving software: http://www.weavenotes.net/Find%20Software.htm

Fabric samples are in PDF format---use Adobe Reader

Graphics files, use a viewer or graphics software

More folder: Contains draft variations and proprietary files for weaving software.

- Look for files sorted by structure or type.

Find all of the overshot drafts or look for 2 block profile ideas. Files are named using the Series, Number titles. A file name that begins with II-8, refers to Series II, No. 8.

Profile drafts were done for all of the Crackle and Overshot drafts. This is a rich source of design ideas.

- All WIF files on the CD are valid.

Weaving software programs have shaft limits just like looms, your software will not be able to open a draft if the draft uses more shafts/blocks than the software's maximum number.

Questions: Contact Judie Eatough at judie@eatough.net, 1252 Uinta Drive, Provo UT 84604-2905.

Mary Meigs Atwater's Recipe Book CD Table of Contents

- Chapter Title
- Weave structure
- Series and Number and design name
  - Graphic of one design on the page
- # of shafts needed
- # of profile blocks
- Other file formats.
- Note: when the profile contains a larger number of blocks, the design is saved as a wif file. Since weaving software programs allow varying numbers of shafts, the design is also saved in three other ways. These designs are for pick-up weaving or drawlooms.
- Pattern Maker, a cross stitch program.
- BMP files, a graphics files
- Pdf files, open with Adobe Reader
- For example: V-3 is a Summer &Winter draft on 8 shafts. The profile has 6 blocks.
- V-5 is a pick-up design using 43 pattern blocks or shafts. Many weaving software programs will not open wif files with 43 shafts.

Series V Table Pieces, Towelling, etc.

		Name	Crackle	Lace	Overhot	Summer& Winter	Twill	Other	Profile #blocks	Pattern Maker (xsd)	(bmp)	Adobe (pdf)
V-1		Bird-eye 3 borders					4					
V-2		Goose-Eye with color stripes					4					
V-3		Pine-Tree				8			6			
V-4			4						4			
V-5		The wif file has 43 shafts							43	yes	yes	yes

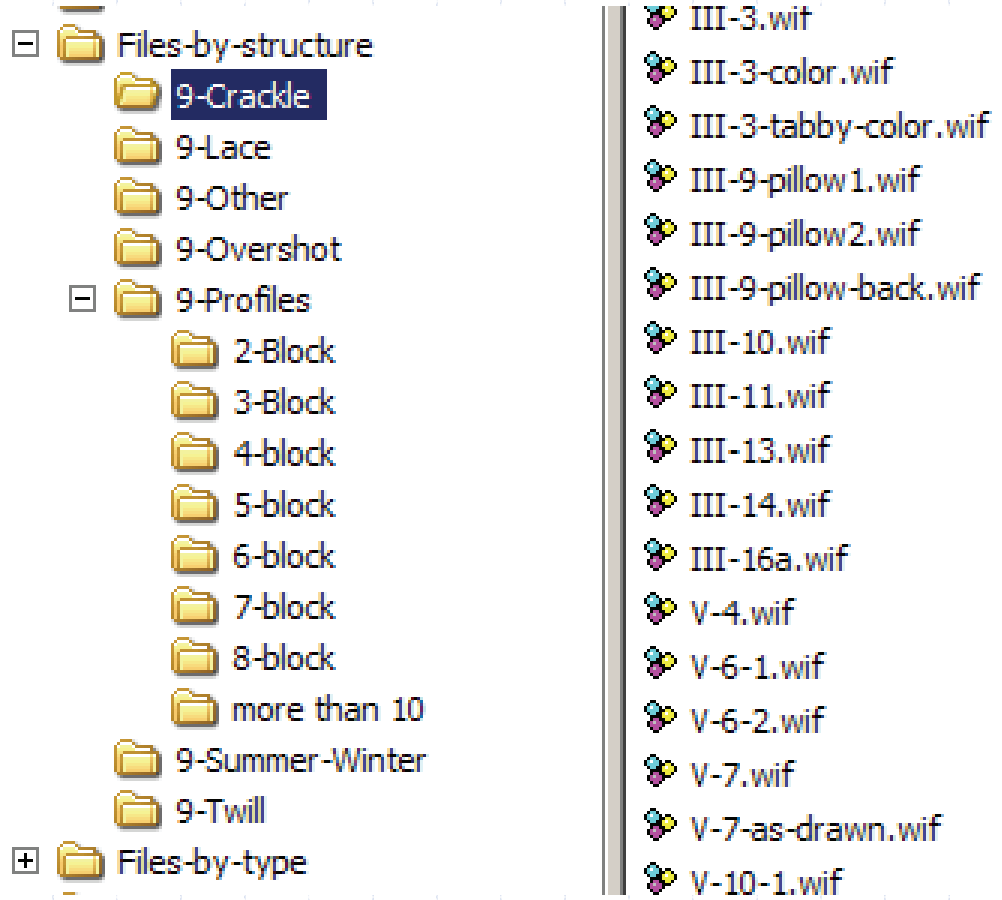
Mary Meigs Atwater's Recipe Book CD
Files by Structure

- All of the wif files for each structure.
- If you are looking for all of the crackle drafts or all of the 6 block profile drafts, this is a convenient way to search for them.
- Crackle, Lace, Overshot, Summer & Winter, Twill and others are the structure types.
- Profile drafts are separated by number of blocks.



©Mary Meigs Atwater Weavers Guild 2005

Mary Meigs Atwater's Recipe Book CD Files by Type

- In this folder the files are separated by file type to make it easier to find them.
- The Types are:
- BMP files
- Fiberworks files
- Patternland files
- Pattern Maker files
- WeaveIt files
- WeavePoint
- WIF files

Mary Meigs Atwater's Recipe Book CD Software for Windows

Fiberworks Demo

This demo will allow you to view many of the wif files on the CD. Used by permission. You will not be able to open all of the wif files since some of them need more shafts than Fiberworks supports.

PatternMaker Viewer

A free viewer for PatternMaker files. These files are used for designs which need more shafts. This is a cross stitch program. The viewer will allow you to print the design.
